

CALLE SAN ANTONIO

CALLE MOLINO

VISTA POSTERIOR  
PATIO INTERIOR

This is a detailed architectural model of a multi-story building, viewed from the rear. The model is constructed from white-painted cardboard or foam board. The building features a complex, stepped profile with multiple levels and terraces. The roof is finished with a brown, corrugated cardboard texture. Several windows are visible, some with dark grilles. A central courtyard or patio area is visible, with thin copper wires used as vertical supports or structural elements. The model is placed on a light-colored wooden surface, with other wooden blocks visible in the foreground and background.
